

PSD2 Availability statistics

This table shows quarterly availability performance of PSD2 APIs. Availability is shown in percentages and is calculated as 100% minus the total percentage downtime. Downtime = The total time in seconds (per day) when any service of the API is not accessible. Downtime period starts when five consecutive error responses are delivered within 30 seconds and ends when the first successful response is sent. Downtime is calculated from the first of the five error messages.

PSD2 Availability statistics

Availability monthly

Month	PSD2 API	PSD2-authorizations	NetBank	Mobile Api*
2019/09	100.0%	100.0%	100.0%	N/A
2019/10	100.0%	100.0%	100.0%	N/A
2019/11	100.0%	100.0%	100.0%	N/A
2019/12	100.0%	100.0%	99.99%	N/A

* Only Mobile API interface. Not the Mobile applications in the customer phones.
